Appendix A: Methodology

The DOSW community needs assessment survey was developed and administered with a specific goal in mind: to inform DOSW's future funding and advocacy around their three core service areas, including Health and Safety, Economic Security, and Civic Engagement and Political Empowerment. This goal drove the survey development process and the recruitment and outreach efforts described below.

Overall completion metrics and an explanation of how cases were categorized and selected for inclusion in the main report are described as well.

SURVEY DEVELOPMENT

The community survey was developed with the following goals in mind:

1. We sought to collect data to understand the respondents' demographic, socioeconomic, and other background characteristics, aligning with the format of existing population-level data whenever possible.
2. We focused on collecting data that we were unable to find in existing data sources at the city/county level for women and nonbinary individuals, or where questions about existing data prompted a need for additional exploration.
3. Whenever possible, we used items from existing national or statewide surveys. This enables DOSW and its partners to make comparisons between the status and wellbeing of the community survey respondents and the broader state and national population.

The following table summarizes the community survey items that were adapted or taken directly from existing national or statewide surveys. Links providing more information about each survey are embedded in each survey title. Additional items not included here were developed by the research team.

Table A1. Summary of DOSW In-Person Community Survey Outreach Efforts

Survey Source (with embedded links)	Items pulled or adapted from source
California Worker Survey (2018)	Current work situation, work type, work hours, pay type, difficulty of taking time off, types of accounts, payment of credit cards, amount owed/saved on accounts, difficulty of emergency expense, some basic needs
Pew American Trends Survey (annually)	Satisfaction with family life, social life, personal financial situation, current job or career, quality of life in local community, work from home, connections to community
Public Policy Institute of California Statewide Survey (annually)	Fairness and stability of work, recognition for work, opportunities for advancement, frequency of financial worries, some basic needs
Household Pulse Survey (US Census Bureau; monthly)	Healthcare costs, childcare costs
KFF Women's Health Survey (periodically)	Responsibility for sick child, reasons for no routine checkup, need for mental health services and reasons for not getting it
California Health Interview Survey (annually)	Physical and mental health status, time since last routine checkup
San Francisco City Survey (every few years)	Safety walking in the day and night in San Francisco
Measuring #MeToo (2018 and 2019)	Harassment items
The Atlantic Civic Engagement Survey (2018)	Participation in political activity, representation by civic and political entities
The Civic Outlook of Young Adults in America Survey (2023)	Degree to which one's vote matters

SURVEY ADMINISTRATION

Community surveys were administered in English, Spanish, and Chinese languages between April 18, 2024 and October 8, 2024. Both paper and online survey formats were utilized.

DOSW used a purposive sampling strategy targeting specific subgroups within the city whose feedback was deemed by the organization to be the most relevant for informing DOSW's future programming and advocacy priorities.[12]

Recruitment efforts focused on the following types of respondents: (1) employees working in city and county departments or local CBOs; (2) community members who receive services or were on mailing lists from those departments and CBOs or followed them on social media; and (3) community members who were intercepted at an in-person outreach site. Additionally, a small number of respondents (n=6) completed a survey at the DOSW-sponsored event Shift Happens in April of 2024. Community respondents were offered a $20 stipend for completing the survey; department and CBO employees were not compensated for their survey completion.

Table A2 shows the organizations that were asked to share the survey internally with their employees and/or distribute it to their clients. Table A3 summarizes the locations and dates where in-person outreach and recruitment with community members occurred. In addition to locations identified in this table, canvassing took place beyond specified sites to include adjacent corridors such as those near West Portal and Bayview libraries.

---

[12] Although girls are a core population for DOSW programming, the survey team chose to limit the survey to those 18 years old and older due to concerns about the significant additional protocols, time, and cost that would be required to get parental consent for younger community members.

COMPLETION METRICS

A respondent was eligible for the survey if they were at least 18 years old and either lived, worked, or attended school in San Francisco. Notably, respondents of any gender were invited to participate, although results in the main body of the report focus on women and nonbinary, genderqueer, and transgender respondents.

A total of 1,121 respondents were deemed eligible for inclusion in the survey results based on these criteria.[13] This included 1,009 complete surveys and 112 partial surveys in which respondents completed at least 30% of the survey questions. 1,056 surveys were completed

---

[13] In addition, thorough data cleaning protocols were implemented to remove a subset of suspected bogus respondents after the survey was inadvertently shared on social media late in the data collection process.

in English, 49 were completed in Spanish, and 16 were completed in Chinese. Paper surveys were completed by 58 of the eligible respondents.

The following demographic summary includes all respondents.

Table A4.   Gender and age of all survey respondents

Demographics	Number	Percent
Gender		
Woman/female	863	86%
Man/male	101	10%
Nonbinary	26	3%
Genderqueer	8	1%
Transgender female	8	1%
Transgender male	3	<1%
Age (mean = 44 years old)		
18 to 35 years old	366	33%
36 to 55 years old	502	45%
56 to 65 years old	137	12%
66 or older	115	10%

Note: N = 1,009, 1,120.

Respondents were asked to indicate all of the racial/ethnic groups that described them. The table below displays these responses in two ways. First, breakdowns are shown for those who only selected <u>one</u> race/ethnicity, with the category "Two or more races" encompassing all respondents who selected more than one category. The second breakdown shows all of the responses that were selected, regardless of how many a respondent chose.

Table A5.   Race/ethnicity of all survey respondents

Race/ethnicity	Number (Percent) selecting or belonging ONLY to this group	Number (Percent) selecting this option (multiple selections possible)
White	416 (42%)	510 (51%)
Hispanic/Latino(a)	181 (18%)	210 (21%)
Asian	173 (17%)	199 (19%)
Black or African American	79 (8%)	117 (12%)
American Indian/ Alaska Native/ Indigenous	7 (1%)	32 (3%)
Middle Eastern or North African (MENA)	10 (1%)	21 (2%)
Native Hawaiian or Pacific Islander	1 (<1%)	9 (1)
Other	32 (3%)	57 (6%)
Two or more	102 (10%)	Not applicable

N = 1,001.

Table A6.   Education, income, and marital status of all survey respondents

Characteristic	Number	Percent
Education		
Less than high school	21	2%
High school diploma or equivalent	68	7%
Some college or associate's degree	161	16%
Bachelor's degree	380	38%
Graduate or professional degree	365	37%
Household income		
Under $50,000 per year	188	21%
$50,000 to $99,999 per year	253	29%
$100,000 to $149,999 per year	195	22%
$150,000 or more per year	247	28%
Marital status		
Married or domestic partner	490	48%
Separated	31	3%
Divorced	97	10%
Widowed	27	3%
Never married	366	36%

Note: N = 995 , 883, 1,011.

Table A7.   Household composition of all survey respondents

| Type of resident	Average	Median	Range of responses
Adults in household	2.16	2	1-12
Children in household	.58	0	0-5
Total people in household (Adults and children)	2.72	2	1-14

Note: N = 993, 999, 993.

SELECTION OF CASES FOR INCLUSION IN MAIN REPORT

DOSW's primary populations for programming and advocacy are women, girls, and nonbinary individuals. Because of this, findings presented in the main report focus on two groups: women and nonbinary individuals. (As noted previously, due to consent issues, no one under 18 was recruited to complete the survey.) In order to increase the number of respondents who could be included in the findings, this report used a broad definition of nonbinary individuals that encompassed those who identified as one of the following: nonbinary, genderqueer, transgender female, or transgender male.

Figure A1. Overview of inclusion of survey results by gender

Respondents' self-identified gender:	How and where they are represented in the report:
Woman/female	**Women** (Main report and Appendix B crosstabs)
Man/male	**Men** (Appendix B crosstabs only)
Nonbinary Genderqueer Transgender female Transgender male	**Nonbinary/genderqueer** (Main report and Appendix B crosstabs)

PRESENTATION OF DATA FOR KEY COMMUNITY SUBGROUPS IN APPENDIX

The San Francisco community encompasses a broad range of people from different backgrounds and socioeconomic circumstances. While a complete reporting of many different community subgroups is beyond the scale of this report, we seek to make the data as targeted and actionable as possible. To this end, we provide a second appendix (Appendix B) with data broken down by the following variables:

- Age, including the following: 18 - 35, 36 - 55, 56 - 65, and 66 and older.
- Race/ethnicity: Subgroups with large enough samples include White, Hispanic/Latino, Black/African American, and Asian.

- Household income, including those earning less than $50,000, $50,000 – $99,999, $100,000 – $149,999, and $150,000 or more.
- Disability status, as indicated by endorsing one or more of three items measuring disability, use of adaptive equipment, and/or presence of a chronic condition that limits daily activities.
- Gender, as noted above, which will include women, men, and a single category of nonbinary/genderqueer, as noted above.

Appendix B: Crosstab Results

Table of Contents

Survey Crosstabs and Means, By Age Group

Notes: Results are shown for the subset of respondents identifying as women or nonbinary (base N = 908). Data are not reported when cell sizes include 10 or fewer cases. Several efforts were made to maximize the amount of reportable data when cell sizes became too small, including (1) collapsing the number of age groups from four to three for some variables by creating a single group of respondents aged 56 or older; and/or (2) collapsing some response categories for selected variables. Even with these adjustments, some cell sizes remained below the threshold value of 11. Those variables are designated below with ^^.

Do you live in San Francisco? * Age group (condensed 56+)

Survey Crosstabs and Means, By Race/Ethnicity

Notes: Results are shown for the subset of respondents identifying as women or nonbinary who indicated they belonged to one of four largest racial/ethnic survey respondent groups (base N = 756). Data are not reported when cell sizes include 10 or fewer cases. Several efforts were made to maximize the amount of reportable data when cell sizes became too small, including (1) removing a specific race/ethnicity group from an analysis if that group had a small number of records in one or more cells; and/or (2) collapsing some response categories for selected variables. Even with these adjustments, some cell sizes remained below the threshold value of 11. Those variables are designated below with ^^.

Survey Crosstabs and Means, By Income Group

Notes: Results are shown for the subset of respondents identifying as women or nonbinary who also provided household income information (base N = 789). Data are not reported when cell sizes include 10 or fewer cases. Several efforts were made to maximize the amount of reportable data when cell sizes became too small, including (1) collapsing the number of income groups from four to three for some variables by creating a single group of respondents earning $100,00 or more; and/or (2) collapsing some response categories for selected variables. Even with these adjustments, some cell sizes remained below the threshold value of 11. Those variables are designated below with ^^.

Do you live in San Francisco? * Annual household income group

Survey Crosstabs and Means, By Disability Status

Notes: Results are shown for the subset of respondents identifying as women or nonbinary who also provided household income information (base N = 841). Respondents were defined as having a disability if they reported that: (1) they have a disability; (2) they have a chornic health condition that limits their daily activities; or (3) they use adaptive equipment. Data are not reported when cell sizes include 10 or fewer cases. Efforts were made to maximize the amount of reportable data when cell sizes became too small, including collapsing some response categories for selected variables. Even with these adjustments, some cell sizes remained below the threshold value of 11. Those variables are designated below with ^^

Survey Crosstabs and Means, By Gender

Notes: Results are shown for the subset of respondents who provided their gender identity (base N = 1,009). Data are not reported when cell sizes include 10 or fewer cases. Several efforts were made to maximize the amount of reportable data when cell sizes became too small, including (1) removing the nonbinary group from an analysis if that group had a small number of records in one or more cells; and/or (2) collapsing some response categories for selected variables. Even with these adjustments, some cell sizes remained below the threshold value of 11. Those variables are designated below with ^^.
